#### **I. Member Forum**

Kate Miller reported that she and Kat Owens met with Cathy from the Parks and Recreation Department. Together they reached out to John Hall to discuss having an event, possibly a Kayak Day, when the Land fill trail project is completed.

The Commission discussed the need for improvements and maintenance at the Maple Swamp property and other open space properties. Marek reiterated that a priority in the draft 2020 POCD will be to development a comprehensive open space management and stewardship plan. Funding for maintenance should be more easily secured with a plan.

The Commission discussed how the draft 2020 POCD will look to concentrate new development within already developed areas and create new neighborhood centers along existing transportation corridors. Kate Miller noted that development along the corridors can negatively impact lower income neighborhoods, which have relatively higher population densities.

A motion to include additional comments for the drafting of the 2020 POCD was made by Katie Miller and seconded by Jim Miller passed unanimously. The comments are as follows:

1. Additional language connecting open space acquisition to the existing ranking system noting that open spaces close to higher residential densities has a high value in the ranking system.
2. Infill development of vacant spaces in lower income neighborhoods can cause environmental justice issues by taking away open spaces.
3. Consider harmful effects of increased vehicular traffic when concentrating development in and near established dense neighborhoods.

A motion to adjourn made by James Miller and seconded by Bob Daniels passed unanimously. The meeting adjourned at 9:39pm.
